MIGUEL IÑAKI PADAY

FULL STACK DEVELOPER

PROFILE

A proficient software developer with exceptional coding, debugging, and project management skills consistently delivers project objectives by developing elegant and scalable code. Adaptable to work within agile and scrum frameworks, the individual is an effective team player.

WORK EXPERIENCE

2022 Present

Full Stack Developer
German Emirates Club | Dubai, UAE

As a full stack developer, I created mobile apps using React Native, design custom databases, created Node.js application & develop API endpoints and user-friendly CMS with React.js. I excel at testing, deploying, and refining applications, while collaborating with fellow developers and managing versions using Git.

2021 Present

Freelance Full Stack Developer
HGHRCLSS Lifestyle | Dubai, UAE

In this project, I planned entity relationships, set up and managed the database, server, and reverse proxy. I built the backend, including API endpoints and authentication, and developed the frontend using various modules, components, and services. Additionally, I tested the API endpoints, styled the frontend layout, integrated a payment gateway, and installed an SSL certificate. After thorough testing, I deployed and continued to maintain the project.

2021 2022

Photographer / Editor
Jawharat Al Khaleej | Dubai, UAE

I captured and retouched jewelry photos for web and social media, adjusting colors and composition. I set up lights, backdrops, and equipment for shoots and managed studio tools, while automating batch processes with bash scripts.

2018 2021

Web Designer / Digital Marketing Specialist
iSee International | Dubai, UAE

I configured PCs and networking, designed webpages using HTML5 and CSS3, and executed daily email marketing for promotions. Additionally, I managed digital marketing requests, helping clients gain traction on social media and other platforms.

2016 2017

Software Engineer I
Kyocera Document Solutions Philippines | Cebu City, Philippines

I implemented enhancements and new functionalities for printers, documented technical specifications and testing methods, and analyzed coding fixes for software problems. In collaboration with project managers, I ensured development timelines were met and planned testing. As a unit and joint tester, I evaluated functionalities from other teams and reviewed and released source code.
